

Where does Uruguay get its energy from?

Uruguay primarily imports natural gas from Argentina via the Gasoducto Cruz del Sur. As of May 2021, there are no new projects proposed for oil and gas in Uruguay. Uruguay generates nearly half of its electricity from wind and solar, more than any other country in Latin America and the Caribbean.

Is Uruguay a repeatable framework of energy sovereignty for developing countries?

Ramírez Mendez Galain believes so. Uruguay's former national director of energy in the Ministry of Industry, Energy and Mining, who was the impetus for the country's shift away from dirty fuels, has been promoting the country's success as a repeatable framework of energy sovereignty for developing countries.

What is the future of energy in Uruguay?

Credit: FRV Future Renewable Vision. After hydropower and wind, biomass is another important energy source, accounting for 15-20% of the electricity Uruguay produces. Wood pulp plants, for example, are now burning organic waste to produce energy for the grid, turning what was an environmental liability into an energy asset.

Does Uruguay produce natural gas?

Uruguay does not produce natural gas and has no proven reserves. In 2016, Uruguay was consuming 53,000 barrels per day of refined petroleum products. In 2017, Uruguay consumed 70.79 million cu m of natural gas. Cite error: Invalid <ref> tag; invalid names, e.g. too many Uruguay imports all of the natural gas that it uses.

How much of Uruguay's energy comes from fossil fuels?

Back then, he said, about half of Uruguay's energy mix came from imported fossil fuels, at a cost that at times exceeded 2% of GDP. The country was also experiencing some energy shortages.

How much energy does Uruguay need?

The Solution to Intermittency Renewable sources--hydroelectric power, wind, biomass, and solar energy--now cover up to 98% of Uruguay's energy needs in a normal year and still over 90% in a very dry one, according to Méndez.
