

Does Vanuatu have a solar farm?

The Pacific island nation of Vanuatu is demonstrating its dedication to sustainability with the initiation of its largest solar farm on the island of Efate. This significant project marks a major step in the country's efforts to cut down on carbon emissions and take full advantage of its abundant solar resources.

How can Etech solar help Vanuatu?

The sun is a powerful source of renewable energy. We can harness that energy to create a sustainable future in Vanuatu and the world. eTech Solar is accelerating the adoption of quality yet affordable solar technology across Vanuatu to conserve our environment and provide an environmentally friendly and sustainable power supply.

Will a new solar micro-grid change Vanuatu's lives?

(Photo: Ian Iercet) On the remote island of Malekula, the second-largest island in Vanuatu, a new solar micro-grid is changing the lives of over 2,800 people- boosting local development while contributing to Vanuatu's sector specific target of transitioning to close to 100 percent renewable energy for electricity by 2030.

Why should you go solar in Vanuatu?

In an era of climate change and unsustainable environmental practices, by embracing solar power Vanuatu can forge ahead with providing affordable, clean energy for all its people. More than ever, a great time to go solar!! Reduce your electricity costs.

What is a Vanuatu solar PV system?

This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu. The installed solar PV system is a stand-alone 230/400 VAC 50Hz solar micro-grid combined with 48V batteries operating 24 hours and 7 days a week.

Is Vanuatu a sustainable country?

Beyond this large-scale farm, Vanuatu has introduced additional sustainable initiatives, such as the installation of solar-powered streetlights and small-scale solar systems in isolated communities. These efforts align with the nation's ambitious goal to source 100% of its electricity from renewable resources by 2030.
