

What is Verdo Energy's decentralized waste to energy concept?

Verdo Energy's decentralized Waste to Energy concept is focused on handling the waste where it is generated and converting the energy form waste into thermal or electrical energy used for private industries or local municipalities with a need of energy. We have four standard sizes for the waste to energy boiler plant, 4MWt, 6.7MWt, 10MWt and 15MWt.

What size boiler does Verdo energy offer?

We have four standard sizes for the waste to energy boiler plant, 4MWt, 6.7MWt, 10MWt and 15MWt. Verdo Energy has many years of experience within biomass conversion, and the company converted its own CHP plant in 2009. At the same time, we supply hot-water boilers in the 1-20MW capacity range for production of heat and steam.

Does Ivory Coast have a reliable power supply?

Unlike other countries in sub-Saharan Africa, the Ivory Coast reliable power supply in the region, exporting electricity to neighboring Ghana, Burkina Faso, Benin, Togo, and Mali. Ivory Coast aims to produce enough renewable energy by 2030 to reduce its greenhouse gas emissions by 28%.

How much energy does Ivory Coast produce?

Energy in Ivory Coast has a capacity of 2,200 megawatts (MW) energy production. Unlike other countries in sub-Saharan Africa, the Ivory Coast reliable power supply in the region, exporting electricity to neighboring Ghana, Burkina Faso, Benin, Togo, and Mali.

Does Ivory Coast engage with private energy companies?

Ivory Coast's engagement with private energy companies is not unique to the region. In fact, public-private partnerships are common across West Africa as they are equally popular with governments and private companies.

What is EDF doing to support Ivory Coast's energy transition?

Renewable energy and... As part of its active involvement in supporting Ivory Coast's commitment to the energy transition, EDF is developing an innovative biomass power plant project in partnership with local energy players. Ivory Coast is aiming for an energy mix in which 42% will come from renewable energy by 2030.
