Background: A Political Dynasty Under Scrutiny The Obiang family's grip on Equatorial Guinea is unparalleled in African politics. President Obiang, who has been in power since a coup in 1979, has fostered a political culture in which family members occupy critical roles across government and military institutions.

Why Viking Necklaces Still Fascinate. Viking necklaces have experienced a revival in recent years, not only because they look stunning, but because of their deep connection to ancient myths. Handcrafted Viking ...

Russia has deployed up to 200 military instructors to Equatorial Guinea in recent weeks to protect the presidency, sources told Reuters, showing Moscow is expanding its footprint in West Africa despite a recent defeat in Mali. The sources said the Russians were training elite guards in the two main cities of the tiny oil-exporting country of 1.7-million people, ...

The Viking Energy Wind Farm, led by SSE Renewables, has reached a significant milestone by infusing over £70 million into the local supply chain since its inception in 2020. More than 70 Shetland companies have benefited from the project, extending its positive impact beyond the region to the wider Scottish and UK supply network.

Fuel up and fuel down before and after your workouts! Sports drinks are designed to replenish lost fluids, minerals, and carbohydrates during intense exercise so that you don't feel depleted when you're done sweating.

The case against Baltasar "Bello" Ebang Engonga, a great-nephew of Equatorial Guinea's President Obiang who is in prison after intimate videos surfaced online, is far more nuanced than it appears. What would the original Balthazar, one of the three biblical Magi of Christian tradition, have thought of his namesake?

Vikings Energy Farm is a 100MW solar PV power project. It is planned in California, the US. The project is currently in permitting stage. It will be developed in single phase. The project construction is likely to commence in 2022 and is expected to enter into commercial operation in 2023.

The project generates 1,800,000MWh electricity and supplies enough clean energy to power 500,000 households, offsetting 610,000t of carbon dioxide emissions (CO2) a year. The Viking Wind Farm (Viking Wind Farm_Phase-I), has 90m high towers. The Viking Wind Farm (Viking Wind Farm_Phase-II), has 90m high towers. Development status
