Saudi Arabia's cement industry is the largest on the Arabian peninsula with an integrated capacity of more than 70 million tons per year. The obvious driver for the sector is the country's booming construction industry, which recorded growth of 3.3% in ...

Some of the landmark agreements Sungrow made over the course of the previous year include, a 7.8 GWh supply deal with Saudi Arabia's Alghaz Holding in July - which at the time was also the world's largest and only a month later overshadowed by a Tesla US deal for 15.3 GWh. Furthermore, the Chinese manufacturer has agreed to deliver 880 ...

The ESS will participate in the wholesale electricity market to provide services necessary to help integrate variable solar PV generation into the grid while reducing peak demand. The EMA, identified solar energy as the "most viable renewable energy source" for Singapore and highlighted the role of ESSs in integrating that resource, said in ...

The Mansourah-Massarrah gold project comprises two open-pit mines under development in the central region of Saudi Arabia. The project is part of Vision 2030, a movement to diversify revenue for the Saudi economy by moving away from oil, with a primary focus on mining underexploited resources including gold.

Among the Yanbu suture ophiolites, the Ess ophiolite is the best-preserved and is among the most complete sections (Johnson et al., 2004) consists of serpentinized peridotites, isotropic and layered gabbros, sheeted dikes and pillow basalts (Fig. 2); they occur as thrust sheets and m&#233;lange blocks within metasedimentary and metavolcanic host rocks.

This will be W&#228;rtsil&#228;'s first gas fired Flexicycle power plant in Saudi Arabia. The plant will provide power to run the Yamama facility, which has a daily production capacity of 20,000 tonnes of cement. Because of the plants" remote locations, most of the cement industry in Saudi Arabia is powered by captive power plants such as this one.
