What is the best type of solar panel?

The best type of solar panel overall is monocrystalline, as it achieves the best peak power output, efficiency ratings, and break-even point, all while looking good. However, perovskite solar panels are coming for its crown. When they're widely available, they'll revolutionise the market - and your electricity bill savings.

How do I choose a professional solar installer?

When choosing a professional solar installer, you should be aware of a few red flags. Get a Quote on Your Solar Panels Installation in 60 Seconds  
The average home can save £1,190 every year with solar panels!  
Solar panels are a long-term investment, so choosing the right installer from the outset can save you a lot of trouble down the line.

How do I choose a solar panel for my roof?

Decide on how much of your electricity bills you want to cover with your solar panel usage -- this can be anything from 10-100%. Your decision will affect the system size and costs. Calculate how many solar panels fit your roof. An average solar panel takes about 1.44 m<sup>2</sup> of roof space. Don't forget to include at least 30 cm from the roof's edge.

Are solar panels a good choice for a vineyard?

There's a good chance if you're considering solar panels that you'll be looking at PV or photovoltaic Solar panels. Of course, if you live in a vineyard in South Spain, your options may vary, but for most of us in the UK, PV cells are the obvious choice. The next thing you may want to consider is the feasibility of installing solar.

Which solar panels does Heatable use?

Heatable uses REA Solar panels, Enphase inverters and AlphaESS batteries in its solar system installations. The company has its own online design tool, eliminating the need for a home visit to provide a fixed quote.
