

# Why can't photovoltaic panels be installed on roofs

Is my roof suitable for solar panels?

If the sun sets in front of you, it's west-facing; if it sets to the left, it's north-facing; and if it sets on the opposite side of the property, it's east-facing. Here's how an installer will decide if your roof is suitable for solar panels, including assessing its direction, usable space, and loft.

Do solar panels damage your roof?

While solar panels themselves will not inherently damage your roof, an improper installation can lead to problems down the line. It is crucial to ensure that the installation is done correctly by a professional, or with thorough research and proper planning if you choose to do it yourself.

Will homeowners be able to install rooftop solar panels more easily?

Homeowners will be able to install rooftop solar panels more easily without costly planning delays. This was published under the 2022 to 2024 Sunak Conservative government. Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today.

What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.

How many solar panels can be installed on a roof?

Your roof will need to be large enough to fit a suitable number of solar panels, as there's rarely much point putting just two or three panels up there. The average solar panel takes up 2m<sup>2</sup>, and your installer should leave around 40cm on each side of the array, as well as 3cm between every panel.

Can a flat roof hold solar panels?

This is because a solar panel system usually weighs about 20kg per square metre, which the great majority of roofs can hold. However, flat roofs may not always be strong enough for solar panels. Drilling into a flat roof can cause leaks, so an installer will usually ballast the panels instead - but these will add around 80kg per panel.
