

How much energy does a PV module produce in Tahiti?

The annual energy output of a single PV module is 256.7 kWh, which corresponds to 7 % of the annual consumption of a typical household in Tahiti. The capacity factor reaches 22.5 %, which makes Faaa a good site for harnessing solar resource. Monthly variations of GHI and k_t . Annual GHI in kWh/m²; retrieved from Global Solar Atlas.

What statistics describe the country solar power potential?

Other statistics (minima, maxima, percentiles) describe the country solar power potential in better detail. Distribution of a photovoltaic power output histogram communicates how much land in the country is available in practical potential Levels 0, 1, and 2, and various PVO_{UT} ranges.

Which countries have the highest PV capacity per capita?

In terms of installed PV capacity per capita (Figure 3.14), the top three positions belong to Germany (554 Wp per capita), Japan (438 Wp), and Australia (390 Wp). At the same time, the top three countries represent very different regions in terms of PV potential: low, moderate, and high. Source: Authors.

Is solar PV a viable alternative to traditional energy sources?

At the start of 2010, the main selling point of the solar PV industry was its small environmental foot-print, but only a minority believed that it could economically compete with traditional energy sources in the near future.

GDP per capita (current US\$) - French Polynesia from The World Bank: Data. Free and open access to global development data. Data. This page in: English; Espa^o; Fran^{ais}; ... World Bank national accounts data, and OECD National Accounts data files. License: CC BY-4.0 ...

The index measures the amount of human capital that a child born ...

Trends in climate -- past, present and future -- always need to be understood in the context of the naturally occurring variability. Climate variability here, refers to the ways how climate conditions (e.g., temperature and precipitation) "flicker" from year to year within their respective typical "range of variability". The cause for this natural variability can be due to quasi ...
