

What is Wartsila Storage+?

The Wartsila Storage+ solution empowers users to get the most out of sophisticated grid-scale energy storage systems. Wartsila's solution includes a rich library of operation logics, integration with connected hardware such as safety equipment and renewable energy generation assets, and advanced asset monitoring capabilities.

What is Wartsila Energy?

Two years ago this month, Wartsila Energy, a global energy storage and management company, announced that it was providing its advanced energy storage technology on a new 200 MW, 500+MWh battery storage facility in Texas funded and developed by Eolian, L.P., a portfolio company of Global Infrastructure Partners.

Who is Wartsila Energy Storage & Optimisation?

Wartsila Energy Storage & Optimisation is leading the introduction of disruptive, game-changing products and technologies to the global power industry. As a battery energy storage integrator, we're unlocking the way to an optimised energy future with our flexibility solutions.

What services does Wartsila offer?

Wartsila provides optimised energy storage technology, including energy storage software, hardware, as well as services.

Who is Wartsila Energy Storage System Integrator?

Wartsila is the third largest energy storage system integrator, according to S&P Global, with a portfolio of over 3.5 gigawatts (GW) and over 7.5 gigawatt-hours (GWh) of energy storage capacity awarded, contracted, or in deployment. Learn more:

Why should you choose Wartsila?

We offer unrivaled solutions to the most pressing energy challenges, including the integration of more renewables. With a long-proven track record globally, Wartsila is a leading energy storage integrator, optimising energy for a smarter and safer grid.

Wartsila has provided cutting edge battery energy storage technology, underpinned by its world leading GEMS Digital Energy Platform, for optimised hybrid system ...

Wartsila has an unparalleled safety record in the industry for its Quantum platform. In November 2023, Wartsila launched Quantum High Energy, an energy storage ...

The Wartsila Storage+ solution empowers users to get the most out of sophisticated grid-scale

energy storage systems. Wärtsilä's solution includes a rich library of operation logics, integration with connected hardware such as ...

Wärtsilä has initiated a strategic review of its energy storage and optimisation business, with alternatives considered including divestment. ... Australian utility Origin Energy ...

System integrator Wärtsilä has launched a 5MWh, 20-foot container battery energy storage system (BESS) product. The firm said its latest grid-scale solution, the ...

Wärtsilä Energy is at the forefront of the transition towards a 100% renewable energy future. We help our customers and the power sector to accelerate their decarbonisation journeys through our market-leading technologies and power ...

Wärtsilä Corporation, Trade press release 27 November 2023 Technology group
Wärtsilä has launched Quantum High Energy (QuantumHE), a next-generation energy ...

Wärtsilä's new Quantum 2 containerised battery energy storage system (BESS) solution is aimed at meeting "customers" varying needs," the company has said. Last week, Wärtsilä Energy Storage & Optimisation ...

Fire-safety is a key feature of Finland-based technology company Wärtsilä Energy's newest battery energy storage system (BESS) called Quantum3, alongside ...

Wärtsilä Energy Storage & Optimisation (ES& O) is a leader in game-changing products and technologies in the global power industry. ... Our GridSolv Quantum energy storage system is ...

The GEMS Digital Energy Platform, Wärtsilä's sophisticated energy management system, will control the dispatch of the energy storage system. Wärtsilä's Storage+ solution empowers users to get the most out of ...

The project includes Wärtsilä's GridSolv Quantum, a fully-integrated modular and compact energy storage system that offers the lowest lifecycle costs, fastest deployment times, highest quality control, and ...

The Ruien Energy Storage project is Wärtsilä's first in Belgium and one of the largest systems in the country to-date. The 25 MW / 100 MWh energy storage system helps the customer to regulate fluctuations and supply peak power ...

The project includes Wärtsilä's GridSolv Quantum, a fully-integrated modular and compact energy storage system that offers the lowest lifecycle costs, fastest deployment ...

The 50 MW / 50 MWh energy storage system in Cowley is the UK's first grid-scale energy storage system directly connected to the transmission-network. The project is the first part of what will be the world's largest hybrid energy storage ...

IHI Terrasun staff working on the Gemini solar-plus-storage project in Nevada, US. Image: IHI Terrasun "One of the key trends that readers should closely monitor is the ...
