

What does Gurn energy do?

At Gurin Energy, we develop solar, wind and energy storage projects to support Asia's sustainable development journey. Jindo Green Solar, located in the south of the country, will become one of South Korea's largest solar power plants.

Who owns Gurn energy?

Gurin Energy is owned by its management team and Infratil Ltd, a listed infrastructure investment company with established renewable energy platforms in the United States, Europe and Australia and a development pipeline of over 30GW. Infratil Ltd is managed by Morrison, a global infrastructure investment company.

What does Gurn Energy's Board of directors do?

Our Board of Directors oversees Gurin Energy's strategy and governance, ensuring that the company progresses towards its goals, operates effectively and at the highest possible ESG standards.

Why is Gurn energy developing a battery energy storage system?

Gurin Energy is developing a pipeline of utility-scale battery energy storage system (BESS) projects to enable greater flexibility of the grid and support the increased use of renewable energy in Japan. The Capas Solar Power Project is a 38MW solar power plant located in Barangay Santa Lucia, Capas, Tarlac Province.

Why should you choose Gurn energy?

Asia is blessed with excellent solar radiation, a largely underutilised source of clean, carbon free energy. Gurin Energy works closely with local communities to ensure that projects are developed in harmony with their surroundings.
